We solicit your cooperation in helping to make the 2023
County Fair the BEST FAIR ever held in Creek County.

When preparing exhibits, read carefully the rules
governing each department in which you expect to enter.
This will avoid misunderstandings at the last moment.

A properly conducted fair should and does result in
quality production. Not one factor does more to stimulate
efforts on the improvement in farm and ranch conditions
than the agricultural fair. It is there that the farmer has an
opportunity to see and observe the progress being made in
the improvements of farm crops and animals and to
compare his work with the efforts of others. His success in
competing with his neighbors stimulates him to greater

efforts and his failures teach him wherein his work is at fault.

It is the purpose of the fair association to make these fairs educational institutions and to encourage cooperation among farmers and men.

The management of the Creek County Free Fair is in the hands of the Creek County Fair Board, which is composed of three members elected from each Creek County Commissioners District annually for three-year terms.

The active management of the fair is in the hands of the executive board, consisting of president, vice-president, secretary, treasurer and five members of the board.

This is your fair and is intended to be of educational value to all who attend. No admission charges will be made where exhibits are present.

Bring the best you have in the way of livestock, farm crops, vegetables, fruit, canned goods, textiles, poultry, etc.

Plan your exhibits early. Read this catalogue. Select exhibits that have merit in their classes. Here is where you compete with your neighbor in your ability to select the best as well as in the production of the article itself.

If you win any contest, your neighbor who exhibits in the same class, can see where he has failed or profited thereby.

Come and bring your family. Do not forget the boys and girls, for they are the farmers of the future. Help to make this fair a great success!

Sincerely,
Josh Enlow, President

Criteria:

Engineering design challenges are intended to encourage 4-H members to use the Engineering design process to create their own projects. These projects should include an engineering notebook, journal or description which answer the following questions about their project. Projects without an engineering notebook will be judged accordingly.

Projects with notebooks will place before projects without notebooks, journals, or descriptions.

- What is the challenge or task of your project (Example: Throw a marshmallow six feet, incorporate technology into clothing, create alternative energy, design and build a rubber band powered car, etc.)
- Draw your design
- How did you test your design?
- What were the results?
- How did you change your design to improve it?
- Did you retest it? Did the results improve?
- Describe your final design and does it work?

Engineering Design Challenges will be judged based on creativity, design, function, and recordkeeping (journal or engineering notebook). **Juniors - grades 3-7; Seniors – grades 8-12.**

Marshmallow catapult challenge design task.

Class

Design requirements:

Design a trebuchet-style swing arm catapult. It may be similar to a teeter-totter or swing set. The beam (arm) is able to swing (go up and down). The arm of the catapult must be adjustable from the center to an offset (One side of the beam is longer from center pivot point.). Use at least five (5) different types of materials or parts (craft sticks, brads, dowels, etc.). Use weights and gravity as the power source. Launch a marshmallow at least six (6) feet. A journal or engineering notebook should be included to describe the creation, purpose and function of the device. Explain how you built and tested your catapult. Chart your marshmallow launches. Reference: National 4-H Curriculum, Junk Drawer Robotics, Level 1. Attach a 3 x 5 note card. Explain how you built and tested your catapult. Chart your marshmallow launches.

Design a wheel-driven vehicle, powered only by one rubber band (size #64 approx. ¼" wide by 3½" long by 1/32" thick.), which will transport a one-pound "load" (box of baking soda approx. size: 3½" x 4½" x 2") at least 9 feet (on a smooth flat floor) while remaining within the boundaries of a 3 ft. wide parallel track (marked off with masking tape). Speed is not a criteria.

There are no restrictions on materials, size, weight or number of wheels. However, the only energy source permitted is the elastic energy of one rubber band. Commercially assembled vehicles are NOT permitted. However, commercially manufactured components may be used as parts of the vehicle. The vehicle must be self-starting (i.e., no pushing, external power starts, etc.). Propulsion of the vehicle must be through the wheels (i.e., no propellers, no launching mechanism). Transferring the energy of the rubber band to wheels via gears, fly wheels, etc., is encouraged. No remote-control devices are permitted.

A journal or engineering notebook should be included to describe the creation, purpose and function of the device. Explain how you built and tested your vehicle and if you made any modifications. Chart or graph collected data and explain how you measured improvements in your engineering notebook or journal.

4-H FABRICS AND FASHIONS**

Fall 2023 – All Design and Construction projects will be REQUIRED to have the Skill Mastery Sheet securely attached to the project. Use a safety pin and attach directly to the exhibit when at all possible. NEVER attach sheet to a hanger! The sheet MUST be completed by the 4-H member.

The skill mastery sheet (<https://4h.okstate.edu/projects/design-and-construction/curriculum-andpatterns.html>) is an education tool to guide project work. Click Sample Technique Cards to find instruction for many of the techniques noted in the skill sheets (i.e. facings, zippers, hems, fasteners, etc.).

Instruction Sheets for the projects listed can be found at: <https://4h.okstate.edu/projects/design-andconstruction/project-guide-sheets.html>

Fair exhibits have been carefully selected and directed for members to investigate and learn specific skills/information and to demonstrate mastery of these skills/information.

The end-product/exhibit is being evaluated on the skills "learned/mastered." The skill sheet serves as the member's "personal reflection" and communicates to the judge what was learned. Why is this important? Because in 4-H, the reflection and application of what was learned is more important than the end product/exhibit.

The skill sheet is to be used as a planning tool. It is important that each 4-H member take responsibility for the life skill of "learning to learn." This may require members,

leaders and educators to look up terms and learn techniques as part of the educational process.

Resources, instructions and project guides are posted online. Members are encouraged to seek out other valid resources which teach proper technique and knowledge in the areas of design and construction.

General Skills to be mastered in project/product in ADC, IDC and HTDC:

* **Structural Design:** Construction technique, size, form, color and texture suited to the materials and product end use.

* **Elements of Design:** The finished product illustrates the member is learning or “mastering” the basic elements of design - line, shape or form, texture, color, and space.

* **Principles of Design:** The finished product illustrates an awareness and application of the principles of harmony, proportion, balance, rhythm and emphasis adding dimension, interest and/or appeal to the finished product.

* **Surface Design:** This is any lines, shapes, colors, textures, or materials applied to the product or item’s design that creates an emotional or personal quality, individuality and creative expression without disturbing initial/end purpose/how it is used. Design is that “something” which makes the item unique to the individual designer. →

Reports/Descriptions/Expense Sheet/etc. – Exhibits requiring a report/description/expense sheet of any kind, can be typed or neatly/legible handwritten. Report should be one-two pages. If typed, it must be double spaced using a minimum of 12-point font. **Report MUST be SECURELY attached to the exhibit.** → A county may enter one (1) exhibit in each class. A 4-H member may enter one (1) exhibit per class. → Hangers will not be returned.
